#### INTRODUCTION

Maryland's proposed capital budget for fiscal year 2004, exclusive of the Department of Transportation, totals \$986,822,000 and is derived from several fund sources:

| Source                       | Amount      |
|------------------------------|-------------|
| General Obligation Bonds     | 740,000,000 |
| General Funds                | 12,975,000  |
| Special Funds                | 129,973,000 |
| Federal Funds                | 60,189,000  |
| Revenue Bonds                | 34,585,000  |
| Qualified Zone Academy Bonds | 9,100,000   |
|                              | 986,822,000 |

General obligation bonds are authorized and issued primarily to provide funds for State-owned capital improvements such as prisons, State hospitals, facilities at public institutions of higher education, and State office buildings. General obligation bonds are also issued for various local capital projects, local jails, public schools, and community health centers. Additionally, the Maryland General Assembly may authorize general obligation bonds for legislative initiatives considered worthy of State funding assistance.

General tax revenues, or general funds, are most frequently used for operating budget items. However, a portion of general funds in FY 2004 has been set aside for capital projects or programs and are identified herein. In the past, these funds have been referred to as "Capital Appropriations" or "Paygo."

Special funds are funds dedicated to specific purposes such as land preservation. They include private grants, user fees, dedicated taxes, and loan repayments.

Federal funds are grants from the federal government, which are designated for a specific purpose, such as construction of military facilities or the financing of housing programs.

Revenue bonds are funds generated through the sale of bonds secured by dedicated revenues and are not considered an obligation of the State of Maryland. Although not subject to the State general obligation bond debt limit, these bonds are subject to State Agency debt ceilings established by Executive Order 01.01.1989.13.

Qualified Zone Academy Bonds are authorizations from the federal government which allow the States or a local government to sell bonds, the proceeds of which are to be used for capital improvements to existing public schools that meet certain criteria. In lieu of interest payments, the purchaser receives a tax credit against their annual federal tax liability.

Nonbudgeted funds are funds generated from fees, charges, grants, donations, and operations which are not included in the State budget because the activities which generate these funds are intended to be self-supporting. The expenditure of nonbudgeted funds for capital projects is subject to the availability of such funds in the amounts and in the years projected, and to decisions of the appropriate governing bodies. Nonbudgeted funds are included in project funding summaries to display total project costs, but are not included in institutional subtotals or grand totals.

For fiscal year 2004, the capital budget proposes \$740,000,000 in general obligation bonds for State-owned facilities and grant and loan programs. An additional \$2,470,000 in general obligation bonds from prior years will be deauthorized to fund FY 2004 projects. Of the \$742,470,000 in new general obligation bonds, only a portion \$722,470,000 is included in the Maryland Consolidated Capital Bond Loan of 2003. Another \$20,000,000 has been reserved as an allotment for legislative initiatives and private hospitals.

#### **INTRODUCTION**

Specific capital projects associated with the allotment for legislative initiatives will be determined during the course of the 2003 Legislative Session.

The fiscal year 2004 capital budget is summarized by fund source and use, by each agency's project or program on the following pages.

Abbreviations used on these pages and in this document are as follows:

# FISCAL YEARS 2004 - 2008 SUMMARY OF CAPITAL PROJECTS POSSIBLY SUBJECT TO FEDERAL RESTRICTIONS ON THE USE OF TAX-EXEMPT FINANCING

The Internal Revenue Service limits the use of tax-exempt bonds for "private purpose" projects to no more than five percent of the tax-exempt bonds issued in a given year. This limit applies to the State's general obligation bonds, as well as to tax-exempt bonds issued by State-controlled agencies. Two conditions must be satisfied for a project to be subject to the limitation. There must be private use and private payment. Private use is use of a tax-exempt financed facility by any entity other than State-controlled agencies or local governments, or on a different basis than members of the general public. One example of private use is the rental of space in a tax-exempt financed building to businesses. Another example of private use could be the operation of a bookstore or dining facility by a private company. Research sponsored by private companies can sometimes constitute private use. The structure of operating or research agreements is also used to determine private use. Private payment is payment for the privately-used portion of a facility above the costs of operating and maintaining that portion of the facility. Also, taking an equity position in a tenant company could lead to a private payment. An example of private payment would be for a tenant in a tax-exempt financed building to pay enough rent to cover some of the debt service. Also, the use of tax-exempt financing for loans would lead to a private payment. The most commonly used term for the portion of bond issues that can be used for private use and private payment projects is "private activity". The following table summarizes the possible "private activity" projects for FY 2004 to FY 2008. The "GO Bonds", and "Dollars Private" columns may include prior funds or funding beyond the capital improvement program.

|   | Total  | GO     | %       | Dollars | Private \$ By Fiscal Year |       |       |      |      |

#### FISCAL YEARS 2002 - 2004 COMMUNITY AND NEIGHBORHOOD DEVELOPMENT AND REVITALIZATION

In 1997, the Maryland General Assembly strengthened Maryland's response to the continuing effects of suburban sprawl by enacting *Neighborhood Conservation and Smart Growth* initiatives. *Smart Growth* establishes a policy for the use of State funds, which support existing communities and influence the location of development. Under this policy, projects in Maryland municipalities, other existing communities, industrial areas, and planned growth area designated by counties will receive priority funding over other projects. These *Smart Growth* areas, called "Priority Funding Areas", are locations where the State and local governments want to target their efforts to encourage and support development and new growth. The following chart summarizes State capital appropriations made for fiscal years 2002 and 2003 and proposed capital appropriations for fiscal year 2004 that support neighborhood and community revitalization and land preservation efforts in Maryland.

|                       |   | ENACTED | ENACTED | PROPOSED |
